| PROJECTS | <ol style="list-style-type: none">1. Website for Vivekanand Seva Mandal http://www.vsmandal.org Designed as per the need of the organization. During this project I leaded a team of four developers. We successfully completed this project in a span of less than a month.2. Library Management System A web-based software built using MVC pattern and the Codeigniter framework for the back-end and bootstrap framework for the front-end for making day-to-day activities of a library automatic. | | |

| | | |
|------------------|----|---|
| | 3. | Virtual Office Virtual Office mainly aims in improving the efficiency of organization, by proper planning. This software will keep a track of employees, teams, tasks assigned to employees and the scheduled meetings. It also consists of an E-mail system, where contacting all or a group of employees becomes easy. |
| | 4. | Android Application On E-voting This application was solely made to make the council voting system online in the college. Technologies used were the Parse and Android toolkit. |
| | 5. | Website on Social Issue - (Human Trafficking) This website was built during a hackathon competition 'Algorithm 1.0'. It displays the social issue in depth using graphics, images, forms to submit complains, suggestions, etc. |
| | 6. | Business Management and Lead Generation (BE Project) The project mainly aims on developing a generic website which can be highly scalable to be able to become the base of any similar project. It connects different NGOs with each other and with common people. Anyone can purchase NGO products, see the events, donate money, etc. |
